

Web Framework Tutorial 03

React + D3

Danqing Shi

Resource: <https://github.com/sdq/react-tutorial>

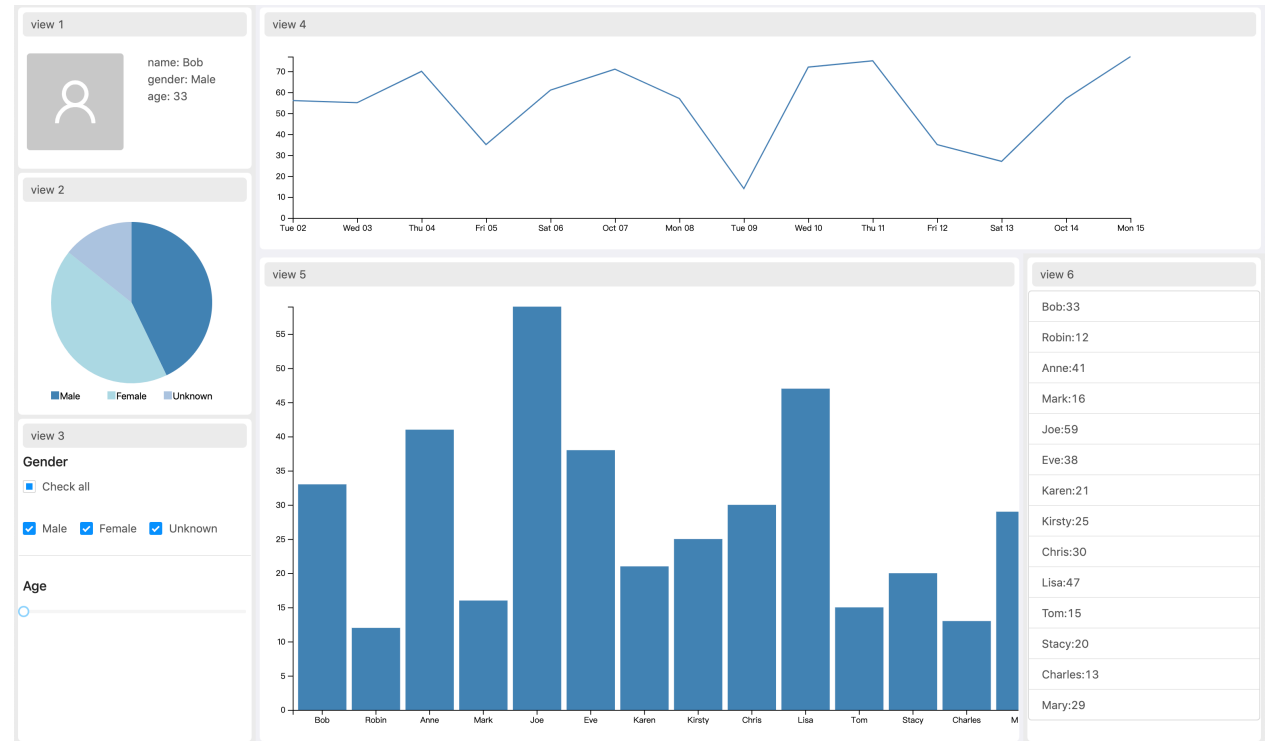

Code: <https://github.com/sdq/react-d3-dashboard>

Build A Dashboard Application with React + D3

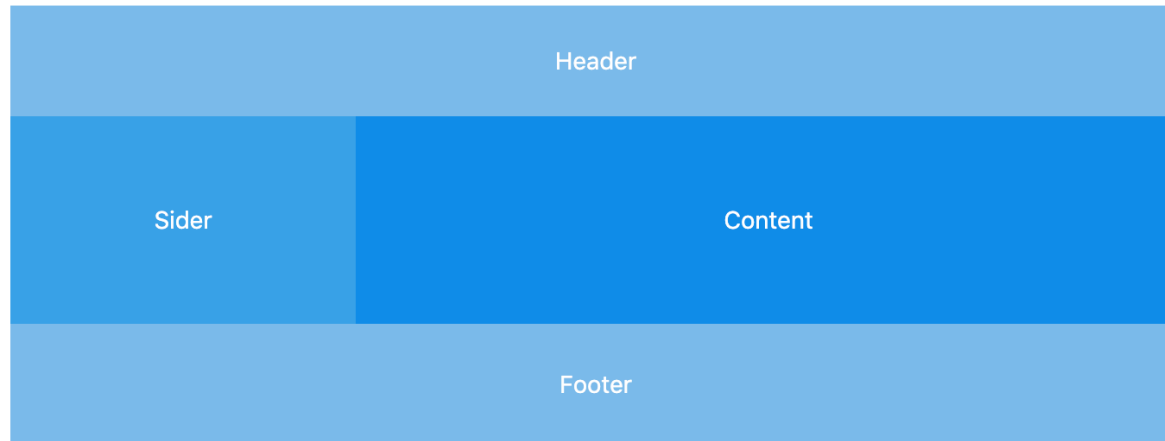

```
const data = [
  {
    'name': 'Bob',
    'gender': 'Male',
    'age': 33,
    'activities': [
      { "date": "2018-10-2", "count": 56 },
      { "date": "2018-10-3", "count": 55 },
      { "date": "2018-10-4", "count": 70 },
      { "date": "2018-10-5", "count": 35 },
      { "date": "2018-10-6", "count": 61 },
      { "date": "2018-10-7", "count": 71 },
      { "date": "2018-10-8", "count": 57 },
      { "date": "2018-10-9", "count": 14 },
      { "date": "2018-10-10", "count": 72 },
      { "date": "2018-10-11", "count": 75 },
      { "date": "2018-10-12", "count": 35 },
      { "date": "2018-10-13", "count": 27 },
      { "date": "2018-10-14", "count": 57 },
      { "date": "2018-10-15", "count": 77 }
    ]
  },
  {
    'name': 'Robin',
    'gender': 'Male',
    'age': 12,
    'activities': [
      { "date": "2018-10-2", "count": 31 },
      { "date": "2018-10-3", "count": 76 },
      { "date": "2018-10-4", "count": 48 },
      { "date": "2018-10-5", "count": 63 },
      { "date": "2018-10-6", "count": 42 },
    ]
  }
]
```

Data

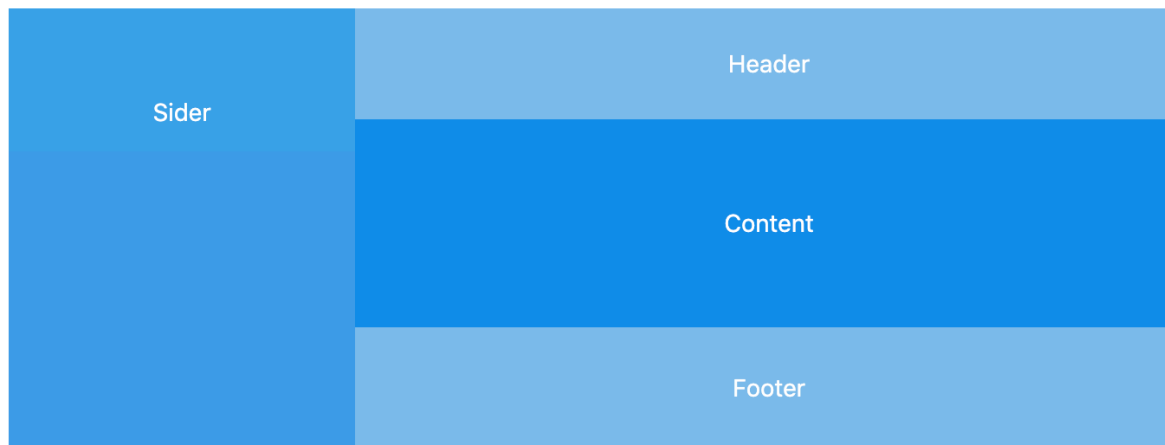

Dashboard

Dashboard – Ant Design Layout

```
<Layout>  
  <Header>Header</Header>  
  <Layout>  
    <Sider>Sider</Sider>  
    <Content>Content</Content>  
  </Layout>  
  <Footer>Footer</Footer>  
</Layout>
```

```
<Layout>  
  <Sider>Sider</Sider>  
  <Layout>  
    <Header>Header</Header>  
    <Content>Content</Content>  
    <Footer>Footer</Footer>  
  </Layout>  
</Layout>
```

Dashboard – Project Starter

```
<Layout style={{ height: 900 }}>
  <Sider width={300}>
    <Content style={{ height: 200 }}>
      <View1/>
    </Content>
    <Content style={{ height: 300 }}>
      <View2/>
    </Content>
    <Content style={{ height: 400 }}>
      <View3/>
    </Content>
  </Sider>
  <Layout>
    <Content style={{ height: 300 }}>
      <View4/>
    </Content>
    <Layout style={{ height: 600 }}>
      <Content>
        <View5/>
      </Content>
      <Sider width={300}>
        <View6/>
      </Sider>
    </Layout>
  </Layout>
</Layout>
```

Write CSS to make dashboard look decent

D3 React Component

React

<https://reactjs.org/>

D3

<https://d3js.org/>

MyChart

- index.js (React container for D3 chart)
- vis.js (D3 code to draw chart)
- style.css (chart style)

D3 React Component

index.js

React container for D3 chart

```
import React, { Component } from 'react';
import draw from './vis';

export default class MyChart extends Component {

  componentDidMount() {
    draw(this.props);
  }

  componentDidUpdate(preProps) {
    draw(this.props);
  }

  render() {
    return (
      <div className='vis-mychart' />
    )
  }
}
```

D3 React Component

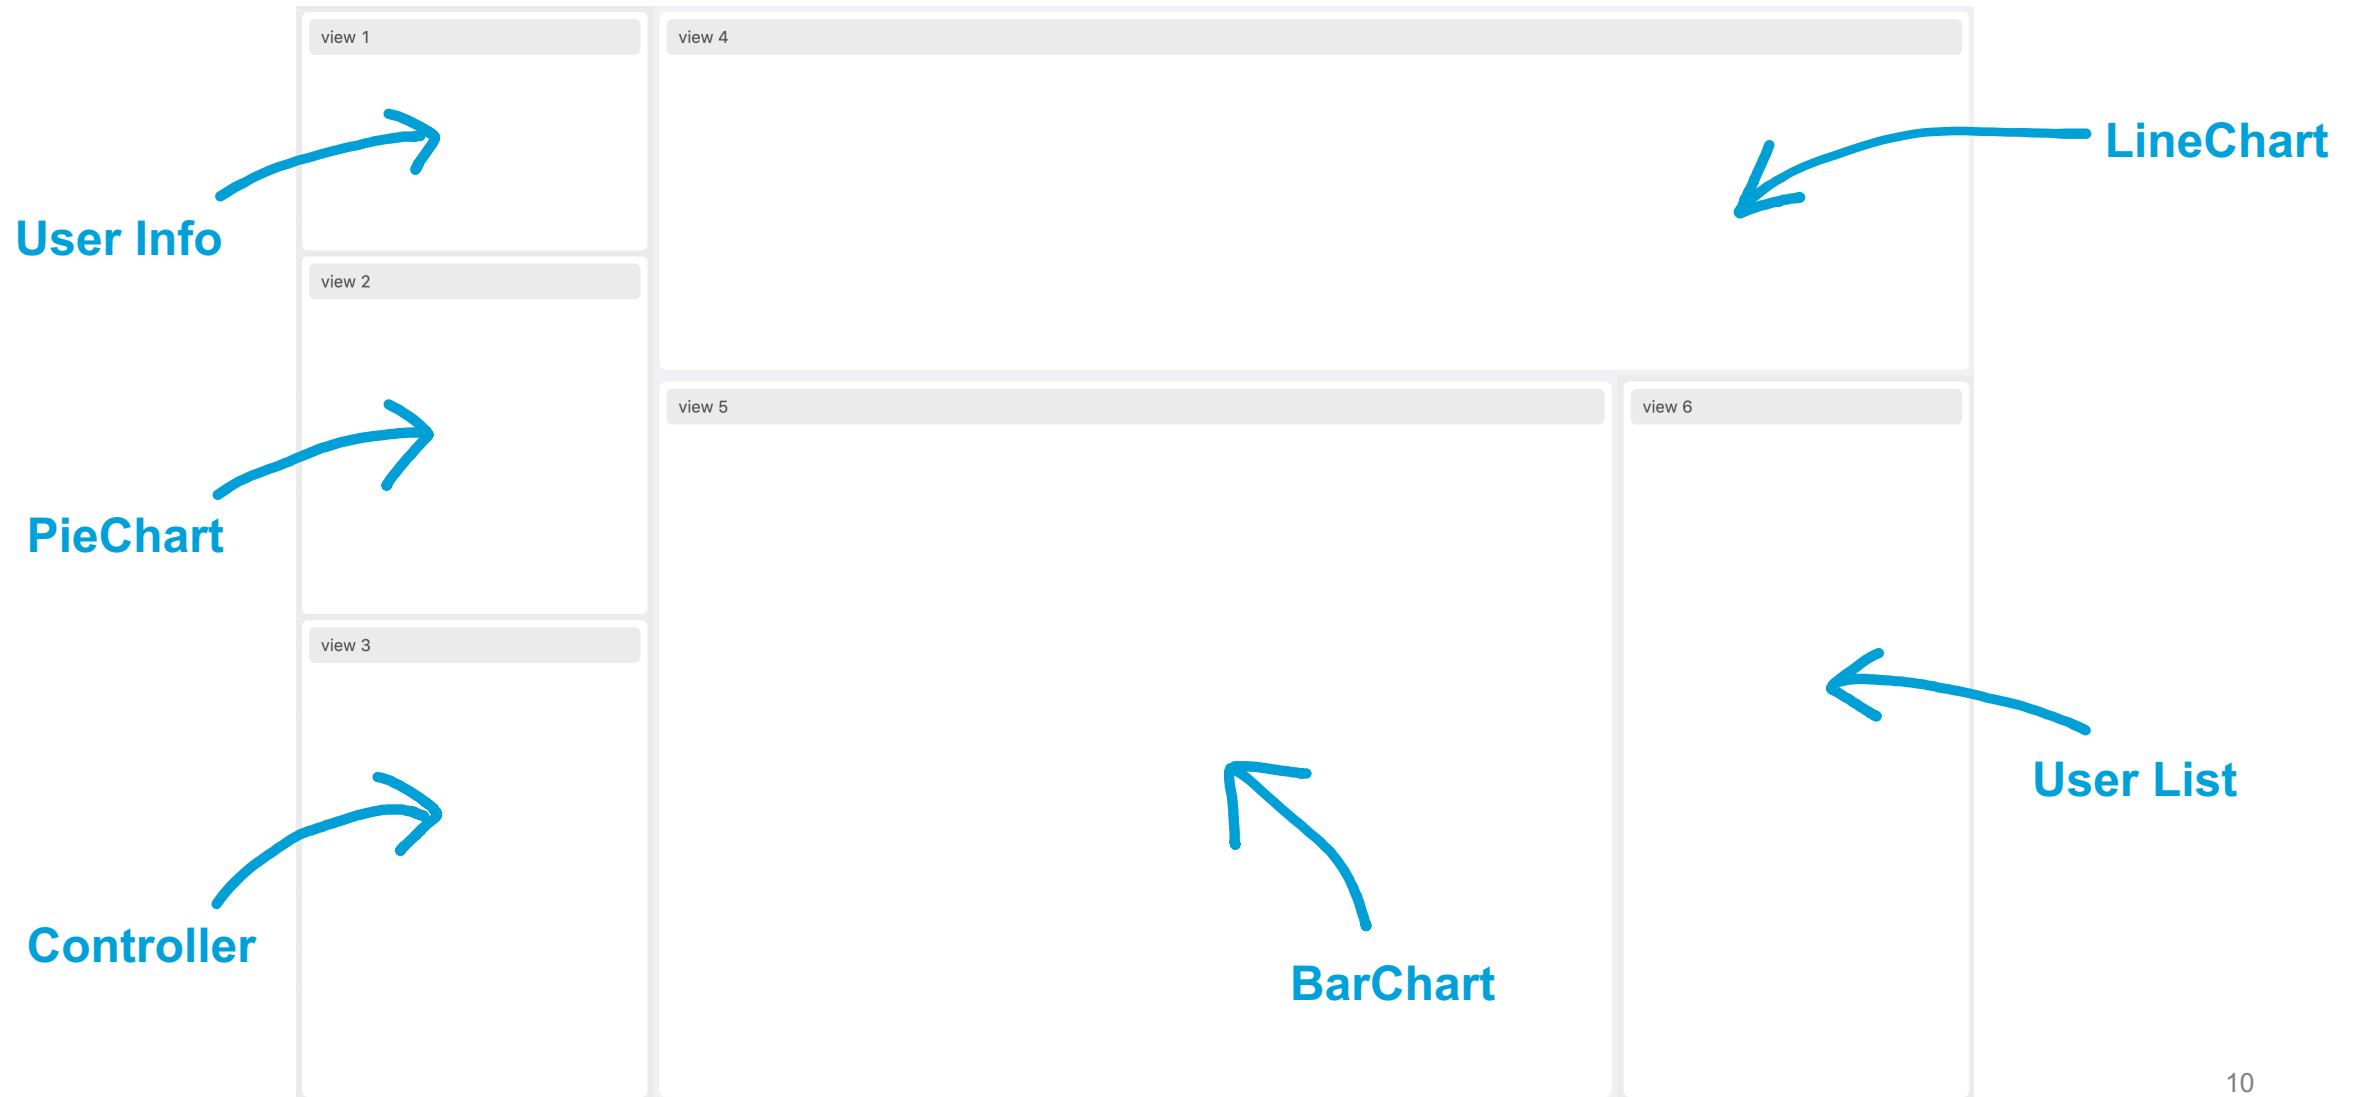

vis.js write D3 code to draw the chart

```
import * as d3 from 'd3';

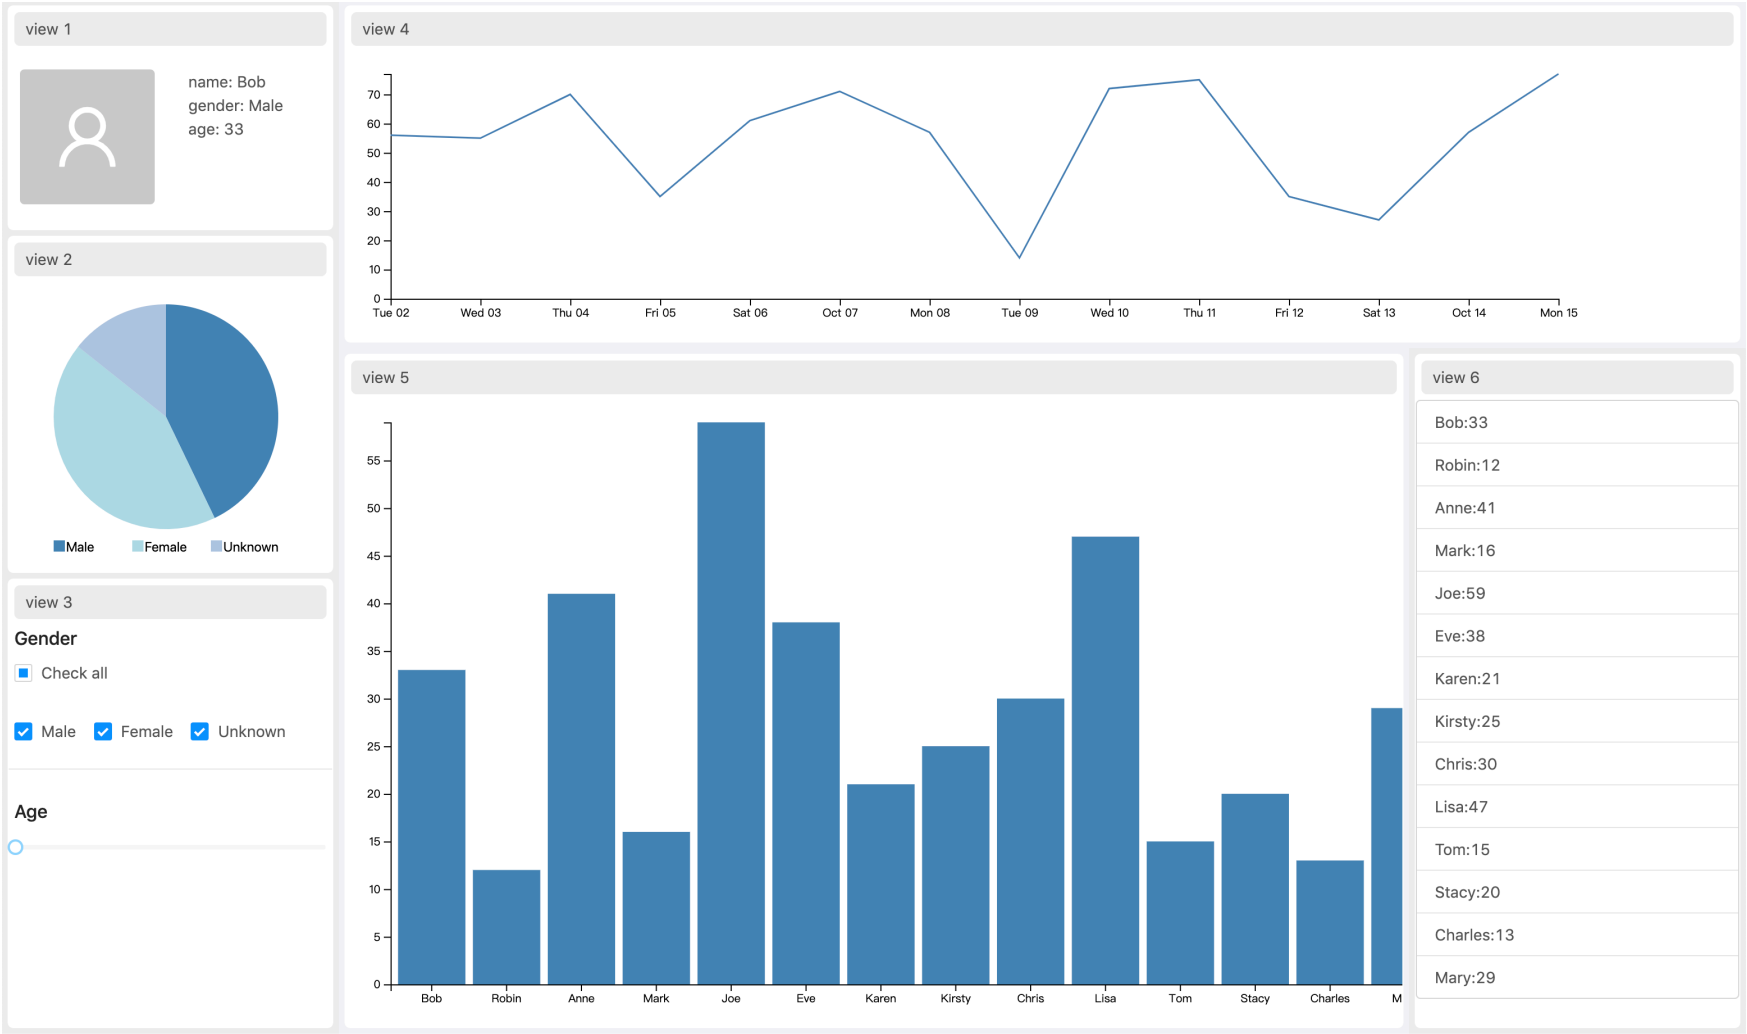

const draw = (props) => {
  d3.select('.vis-mychart > *').remove();
  const data = props.data;
  const width = props.width;
  const height = props.height;
  let svg = d3.select('.vis-mychart').append('svg').attr('width',width).attr('height',height);
  //TODO: draw the chart
}

export default draw;
```

Add Components to Views

Dashboard with Components

Add Interactions

Selected User's Info

view 1

name: Bob
